

British Rema appoints John Robinson as new Technical Sales Director

Powder processing specialist British Rema is pleased to announce the appointment of Dr John Robinson in the new role of Technical Sales Director, to lead the commercial function of its Process Equipment division. With a background in Mechanical Engineering and a PhD in Materials Engineering, John brings to the role over 25 years of senior technical, commercial and operational experience in the powder industry.

John spent much of his early career in innovation and technical leadership roles, working on the development of advanced powder products, particularly metal oxides. Having worked overseas for many years, John returned to the UK to serve in various senior positions including Commercial Manager of the Polishing Powders division of AMG Superalloys and subsequently its Chromium and Advanced Alloys metal powder processing function.

In his new role John will focus on the development and growth of the company's core range of milling, classifying and blending systems as well as on its contract processing business.

This appointment continues to build British Rema's in-house technical and scientific expertise as it responds to clients' needs to develop processes and products in collaboration with powder specialists.

British Rema specialises in the milling, micronising, classification and blending of powders and is a leading supplier of powder processing equipment and contract processing services for the Chemical, Food, Metal Powders, Mineral, Pharmaceutical and Plastics industries.
