committed to quality and service

Laser welded ducts

Advantage of the laser welded galvanised duct compared with the traditional lock formed duct is the advanced leakproof. As well as being leakproof, the laser-welded ducts are characterised by a perfectly smooth interior surface. This increases durability, creates less turbulence and thus a better flow in the duct. More leakproof duct and a better flow generate significant energy savings, which benefit the end user. Truduct laser welded ducting is easy to cut and re-lip while on site. Clipped together with Truduct rapid lock pull rings or tension clips will ensure a tight connection.

Laser welding seam

Laser welded ducts available
in 80mm – 400mm diameter
2m – 1m – 0.5m lengths
EX STOCK

Comparison
Laser welded - Lock formed

Rapid lock pull rings

Tension clips &
wide tension clips

Ducting is also available in 2mm primed mild steel or 304 stainless steel.
